PROJECTS

Library Manegement System, 6 Months

A college library management is a project that manages and stores books information according to student's needs. The system helps both students and library manager to keep a constant track of all the books available in the library. It allows the student to search for the desired book.

Hotel Reservation Syatem, 5 Weeks

This Online Hotel Reservation System will help the user to make reservation for hotels online. The user can check the availability of the rooms. The tool provides an option to input start and end dates of the booking. It also takes input such as the number of guests. Depending on the availability of the rooms the user can book the room. The user also has an option to update the reservation details. The user can view the room rates. He can check for different amenities provided by the hotel. This would ease the customer to book rooms. The Interface is simple which uses latest web technologies.

grocery shop management Desktop Application, 5 Weeks

Grocery Shop Management System is a desktop application and developed in . Net & MS SQL Server. Database can be setup in cloud server, offline network or single computer. Grocery Shop Management System is managing all the information about products, product brand, product category, vendors, customers and product stock.
